Allowable Subject Matter

Claims 1-29 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process, as called for in claim 1, for production of cumene by reacting benzene with isopropyl alcohol in a catalytic membrane reactor provided with a polymeric membrane. The closest art - Haag et al (5,100,596) - discloses a process as discussed in the Office action. However, as argued by applicants, Haag actually does not disclose using a polymeric membrane for the alkylation. Further, as disclosed in the specification, applicants show in examples that using a catalytic polymeric membrane reactor yields a higher cumene selectivity when compared with the use of a conventional reactor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
